

Patent Analytics How-to Webinar Series: Episode 02

How to Make and Use Portfolio Curation, Competitive Patent Landscape and SWOT Analysis Reports

5-Episode Analytics How To Webinar Series

Episode 01 – How to Make and Use Portfolio Analytics, Patent Landscapes, and Patent Watching/Surveillance Reports

Thursday, February 25th, 2021 at 12:00 PM CT

Episode 02 – How to Make and Use Portfolio Curation, Competitive Patent Landscape and SWOT Analysis Reports

Thursday, March 25th, 2021 at 12:00 PM CT

Episode 03 – How to Make and Use Freedom to Operate Maps and Analysis, Product Coverage Analysis and Maps

Thursday, April 22nd, 2021 at 12:00 PM CT

Episode 04 – How to Make and Use Prosecution/Attorney Analytics and Examiner Analytics

Thursday, May 27th 2021 at 12:00 PM CT

Episode 05 – How to Make and Use Blue Ocean/White Space Maps

Thursday, June 24th, 2021 at 12:00 PM CT

Episode Overview

Competitive Patent Landscape and SWOT Analysis: Customized Ontologies, Patent Landscape Selection and SWOT

Portfolio Curation: Customized Curation of a Portfolio According to Unique Client Needs

Competitive Patent Landscape and SWOT Analysis: Customized Ontologies, Patent Landscape Selection and SWOT

Customized Ontologies, Patent Landscape Selection and SWOT

What is it?

- A custom Patent Landscape and SWOT Analysis is tailored to the product space and competitive landscape of the client.
- Mapping ontologies are customized to the client's needs and preferences in consultation with client's legal and/or engineering team.
- The analysis organizes and classifies patents in a landscape by product/technology, importance and value relative to a company's business, strategy and goals.

What is SWOT?

- Strategic planning technique related to business competition
- Used to guide decisionmaking process

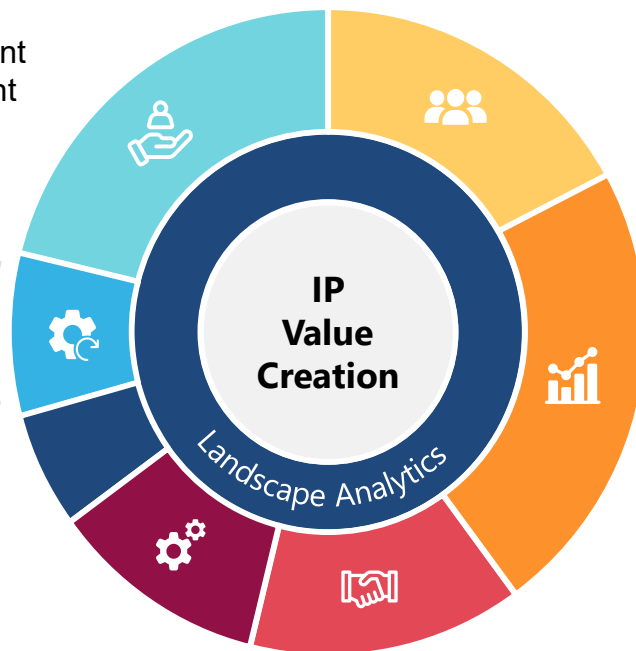

Value Proposition

Identify strengths and weaknesses of a company's patent position in order to optimize patent and product strategy.

Strengths
Weakness

Competitive Intel

Gain strategic competitive insight into the relative strengths and weaknesses of the patent positions of competitors in a technology space.

Identify possible emerging threats in a technology space.

Threats

Opportunity

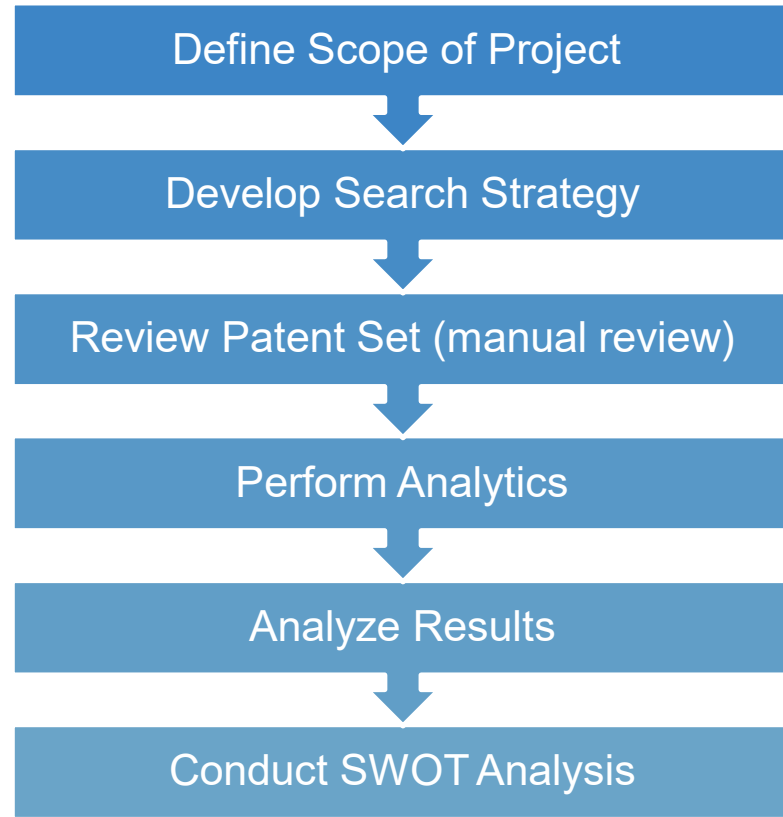

Identify opportunities to expand in a technology space (e.g., potential partnering, licensing, acquisition opportunities)

Process and Cost

- Scoping of project and identification of key project deliverables
- Identification of technology and product categories/ontology
- Determination of any special ranking considerations
- Automated and manual categorization and ranking of patents and applications in the portfolio
- Generation of Reports based on the rankings and categorizations

Outline of Process

Search Strategy – Customize Search Based on Scope of Project

Review Strategy

Goal: to obtain useful observations for SWOT analysis

- Relevancy– filter out noise
- Technology group
- Claim quality
- Claim type
- Identify key patents per assignee

Landscape Analysis

- Identify Top Players
- Identify Portfolio Characteristics
 - Expired vs. Active
 - Pending Cases Trends
 - Abandonment Rate
 - Claim Scope
- Identify Filing Trends

Top Assignees - Technology Area
All Identified Matters Regardless of Status

Status Breakdown

Portfolio Characteristics

- Expired vs. Active
- Pending Cases Trend
- Abandonment Rate
- Claim Scope

Notable Patents

Technology Filing Trends

SWOT Analysis

STRENGTHS	WEAKNESSES
<ul style="list-style-type: none">• Large, strong portfolio in foundational A234 technology• Considerably more active patents than other competitors	<ul style="list-style-type: none">• Significant percentage of portfolio is expired or will expire soon• High rate of abandonment• Claim scope appears to be narrower than competitors• Weaker patent position for C119 technology
OPPORTUNITIES	THREATS
<ul style="list-style-type: none">• Reduce abandonment rate by implementing pre-filing screening• Target prosecution of key applications (improve claim scope)• Investigate partnership opportunities for C119 technology• Investigate different applications for B665 technology	<ul style="list-style-type: none">• Competitor 1 has a strong portfolio in A and B technologies• Competitor 2 has substantially increased filings in A234 technology in recent years• Smaller players filing in C119 technology• Emerging B665 technology may disrupt A234 technology market

Portfolio Curation

Customized Curation of a Portfolio According to Unique Client Needs

What is it?

- Portfolio Curation is customized to the needs of the client and is performed according to a standardized methodology employing professional judgement and proprietary software tools.
- Curation organizes and classifies patents in a portfolio by product/technology, importance and value relative to a company's business, strategy and goals.
- Curation parameters such as the selection of classifications and ranking factors are specified by the client.

Value Proposition

- Identify valuable patents for cultivation, assertion, licensing or strategic positioning
- Valuation of portfolio provides an ROI metric useful for adjusting investment in the portfolio
- Identify misaligned assets to be disposed of or dropped from renewals rolls
- Find valuable patents held by competitors or others in a given technology space for tactical awareness or acquisition

Process and Cost

- Scoping of project and identification of key project deliverables
- Identification of technology and product categories meaningful to the company managers
- Determination of any special ranking considerations
- Automated and hands-on categorization and ranking of patents and applications in the portfolio
- Generation of Reports based on the rankings and categorizations

Patent Curation: Why Do It?

- Generate Reports of Increasing Granularity
- Early curation generated reports for senior management of a company and its investors
- Reports included number of patents over time by country; number of patent applications over time by country; patents/applications by business unit
- Costs of patents and patent applications
- Patents/applications tagged by business unit and country

Patent Curation: Why Do It?

- Generate Reports
- Reports for Business Unit Managers include Patents and Applications Covering Activities for Projects
- Projects May Be Directed to Products or Product Features
- Patents/Applications Tagged by Business Unit and Project
- Special Patents, i.e. Standards Essential Patents Identified
- Tagging Allows Business Unit Managers to Determine Costs of Patent Protection by Project

Patent Curation: Why Do It?

- Generate Reports
- Scientists, Engineers, Inventors
- Claim Curation: ClaimBot—What do Company Patents Cover?
- Inventor Curation: Identify Experts within the Company—Inventors by Project
- Patent Subject Matter Curation: USPTO Classes or Internal Tags

Patent Curation: Why Do It?

- Generate Reports
- Scientists, Engineers, Inventors
- Competitive Intelligence
- General Search of Forward and Backward Citations—Who is “drafting off” the company’s inventions; Is the Company “drafting off” the inventions of any other company

Portfolio Curation

- Customized to the need of the client
- Organizes and classifies patents by product or technology
- Automated and hands-on categorization and ranking
